

TEXEL

HDPE VERMIBED

ORGANIC FARMING

Why Vermicompost?

Vermicomposting is the future of organic farming. It helps convert all your organic waste into nourishing manure for your crops through the use of earthworms, which makes it entirely natural. It increases crop yield and improves the overall health of your soil, which ensures better germination, significantly reduced weed infestation and decreased cost of irrigation. The improved quality of crops fetch higher prices.

Vermiwash, the liquid produced during the process of making vermicompost can be diluted and used as an organic and completely safe pesticide for your crops.

Fabric Structure

Texel Industries Ltd. offers a cost effective solution for making vermicompost. Texel HDPE Vermibeds are specially manufactured to cope with both indoor as well as outdoor composting operations. They are made from 100% multilayer coated HDPE woven reinforced fabric with UV stability and are puncture resistant, waterproof, and unaffected by most chemicals which makes them strong, durable and compact.

Fitted with aeration windows, to allow the compost to maintain proper moisture and oxygen levels for microbial population to operate and grow at peak efficiency, they also help to remove excess heat built up.

Salient Features :

1. Texel Vermibeds offer a unique combination of simple installation, optimal aeration control, light weight material and extremely tough construction.
2. Texel Vermibeds can be easily installed. Several beds can be erected in just a few hours.
3. They are compact and easy to transport.

Product Specifications :

- Indian Standard:- IS : 15907
- Standard Size :- 3600mm X 1200mm X 600mm (LXBXH)
- Texel HDPE Vermibeds can be made as per your requirements.
