

# TEXEL AZOLLA-BED

## ORGANIC FARMING ANIMAL HUSBANDRY

### What is Azolla?

Azolla is a nutrient dense aquatic fern rich in protein, essential amino acids, minerals and vitamins. It is easy to grow in large quantities in almost all weather conditions, and is known to significantly improve the overall health of cattle as well as poultry, thereby increasing their yield. It is the cheapest organic feed available and can also be used as a bio fertilizer.

### How is it grown?

Azolla is grown from spores in water bodies. It is not dependent on water depth or soil conditions for its growth, and can be grown within a span of three to four weeks with very little care. It is low on time investment, high on nutrition and can completely replace commercially available feed.

## Azolla Weed

Texel Azolla Beds are compact, cost effective and strong. Manufactured from multilayer reinforced HDPE Geomembrane, Texel Azolla Beds are U.V. stabilized, puncture resistant, fungus resistant and waterproof. They can be erected on any surface in a short amount of time and are given with a sheet to provide inbuilt shade.

### Salient Features :

1. Texel Azolla beds offer a unique combination of light weight material and extremely tough construction.
2. Texel Azolla beds are long-lasting and economical.
3. Texel Azolla beds are compact, easy to transport and install. Several beds can be erected in just a few hours.
4. Texel Azolla beds are made to the exact depth required for optimum Azolla cultivation.
5. Texel Azolla beds are installed above ground, which means that there is no digging or compacting of pits required.

### Product Specifications :

- Standard Size :- 12.5' X 5' X ½' (LXBXH)
- Texel Azolla beds can be made as per your requirements
- Made from Geomembrane having Indian Standards:- IS: 15351
